

Reedhi Gohel

Fresher – Seeking Software / Full-Stack Development Internship

+91-9422172898 — gohelreedhi@gmail.com — Pune, Maharashtra, IN — [linkedin.com/in/reedhi-gohel0a1024270](https://www.linkedin.com/in/reedhi-gohel0a1024270) — github.com/Reedhi11

PROFESSIONAL SUMMARY

Motivated Computer Applications student with hands-on experience building full-stack web applications using React and FastAPI. Certified in Google Project Management and Java Programming with a strong foundation in RESTful APIs, relational databases, and responsive front-end design. Demonstrated leadership as a Scrum Master delivering Agile-based projects on time. Actively seeking an internship to contribute to real-world software development in a collaborative team environment.

EDUCATION

MIT-World Peace University

Master of Computer Applications (MCA), CGPA: 8.28/10

Pune, Maharashtra

2024 – Present

Savitribai Phule Pune University (SPPU)

Bachelor of Business Administration in Computer Application, CGPA: 7.53/10 – A Grade

Pune, Maharashtra

2021 – 2024

PROJECTS

FitTrack – Full-Stack Fitness Tracker Web Application

React, FastAPI, Python, PostgreSQL, JWT Authentication, REST API, Git

- Developed a full-stack fitness tracking application with a React front-end and a FastAPI (Python) back-end, enabling users to log workouts, set fitness goals, and visualize progress over time.
- Designed RESTful API endpoints in FastAPI with JWT-based authentication, handling user registration, workout CRUD operations, and progress analytics with structured JSON responses.
- Built a responsive React UI with reusable functional components, integrating Axios for API calls and React Router for client-side navigation across dashboard, goals, and history views.
- Modelled and managed relational data in PostgreSQL using SQLAlchemy ORM, applying schema design best practices to support efficient querying of user and workout records.

Coin Fusion – Bitcoin Price Direction Predictor

HTML, CSS, JavaScript, SQL, REST API

- Built a clean, responsive front-end interface using HTML, CSS, and JavaScript to collect user inputs and display Bitcoin price movement predictions (Up/Down).
- Integrated backend prediction logic via REST API calls, processing user inputs and returning structured forecast responses.
- Implemented persistent storage of prediction history in a SQL database, allowing users to review past forecasts and accuracy trends over time.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Frontend: React, HTML, CSS, Responsive Web Development

Backend: FastAPI, REST APIs

Databases: PostgreSQL

Tools & Platforms: Git, GitHub

Concepts: OOP, SDLC, Networking (HTTP, TCP/IP)

CERTIFICATIONS

- Google Project Management Certificate – Coursera
- Complete Java Programming Course – Udemy
- Introduction to IoT and Digital Transformation – Cisco Networking Academy

EXTRA-CURRICULARS & ACHIEVEMENTS

- **Scrum Master** – Led a website development team, managed sprint planning and task assignments, and ensured on-time delivery using Agile methodology.
- **Head of Event** – Mandala, Astitva Fest – coordinated logistics and team operations for a large-scale college cultural event.
- **State-Level Chess Competition** – Recognized participant demonstrating analytical thinking under pressure.
- **NSS Volunteer** – Active community service participant.
